

# Tower Mount, LLC

The Tower Mount M1 (Patent Pending) hitch mounted tower inserts into a standard 2" or 1 1/2" hitch on a vehicle. A six foot, and optional four foot, version of the tower has several built-in universal mounting solutions for medium & large mobile and small base antennas. Additionally, the top of the tower has been designed to support 30 feet of 1 1/4 inch mast for field operations. Whether you are performing a remote broadcast or supporting emergency field operations, the Tower Mount M1 is the single most durable solution to mounting mobile antennas with excellent ground connectivity.
